Anywaves Goes from International to Multinational with the Launch of Anywaves US

PRESS RELEASE
SALT LAKE CITY, UT
AUGUST 11, 2025

Anywaves, the Space Antenna Makers, is moving forward with its global growth by launching Anywaves US, making its transition from an international to a truly multinational organization. To lead this new phase, Nicolas Hine has been appointed General Manager of the American entity.

Nicolas Capet - President of Anywaves and Nicolas Hine - General Manager of Anywaves US

Anywaves US: A Strategic Footprint for a Multinational Vision:

Backed by its two Excellence Supplier Awards from Maxar in 2023 and 2024, Anywaves has already demonstrated its ability to deliver best-in-class products to the American market. Today, the Space Antenna Makers are taking the next step as **the company transitions from an international presence to a true multinational organization with the launch of Anywaves US.**

With the United States hosting most of the global space industry's business, **being closer to its key American customers and partners will allow Anywaves to refine its product roadmap and ensure even stronger market fit.**

Beyond this strategic expansion, **Anywaves US embodies a forward-looking vision with the ambition to become an active contributor to the American space industry.** As part of this vision, future growth plans will include innovation partnerships and local assembly lines: *«This new step is a big challenge and an exciting opportunity for Anywaves. Expanding from international to multinational is more than just a new office: it's about building long-term collaborations, investing locally, and becoming part of the global industrial space dynamic.»* **says Nicolas Capet, PhD, President of Anywaves.**

Nicolas Hine to drive Anywaves US Development

To steer this major milestone, Anywaves has appointed Nicolas Hine as General Manager of Anywaves US. A French American executive with deep expertise in aerospace and high-tech industries, **Nicolas brings extensive experience in finance, operations and strategic leadership across multinational corporations and ambitious scale-ups alike.**

From building global audit teams and steering international compliance projects to directing finance and operations for complex aerospace programs, **Nicolas has a proven track record of bridging global and local priorities.** His successful previous experiences in leading organizations such as Mangata Networks, OneWeb Satellites, Zodiac Aerospace, and Raytheon Technologies, together with his background in program management, industrialization, and strategic partnerships, support Anywaves US' ambition to strengthen its market fit, develop local collaborations, and expand its industrial footprint in North America.

In his new role, **Nicolas will oversee Anywaves' operations in the United States, guide its next stage of growth, and define the state that will soon host the company's American headquarters.** Commenting on his appointment, Nicolas Hine adds: *«I'm thrilled to join Anywaves and lead this new chapter for the company. Anywaves' reputation for excellence speaks for themselves, and I'm eager to help grow that success even further here in the United States. It's an exciting challenge and I look forward to building strong connections with our local partners and customers to expand Anywaves' presence and impact in the US market.»*

The launch of Anywaves US marks the Anywaves' transition from an international presence to a fully multinational organization. This milestone highlights the company's commitment to the global space market, starting with the United States.

Building on Nicolas Hine's expertise and local knowledge, Anywaves US is now ready to bring the company closer to its American customers and partners, strengthen its market fit, and support its long-term industrial ambitions in North America.

About Anywaves

Anywaves, pure player in the space industry, aims to become the global leader in its market.

The company designs, manufactures, and delivers high-performance space antennas and RF payloads worldwide, offering both off-the-shelf and custom solutions.

Driven by an innovative industrial vision, Anywaves adopts the highest market standards, including EN 9100 and ISO 27001 certifications.

Performance, reliability, and short lead times are at the core of its value proposition.
